

EDITORIAL

The Mathematical Association of Thailand under the Patronage of His Majesty the King, the Center for Promotion of Mathematical Research of Thailand (CEPMART) has started a national mathematical conference in 1995 and was held continuously every year. All meeting is organized by the department of mathematics from various universities co-rotating together.

This year, the Department of Mathematics, School of Science, King Mongkut's Institute of Technology Ladkrabang (KMITL) was assigned by the Thailand Mathematics Research Center to host the 25th Annual Meeting in Mathematics 2021 (AMM 2021). This time, the purpose of the event was to link mathematical research to mathematics for innovation development. Topics of the AMM 2021 interest include, but not limited to the following:

1. Pure Mathematics
 - Algebra and Number Theory (AN)
 - Combinatorics and Graph Theory (CG)
 - Topology and Geometry (TG)
 - Analysis, Fixed Point Theory and Applications (AF)
2. Applied Mathematics
 - Control Stability and Optimization (CO)
 - Differential Equations, Dynamical Systems and Their Applications (DE)
 - Mathematical Modelling (MM)
 - Numerical Analysis and Scientific Computing (NS)
 - Computer Science (CS)
3. Mathematics Education (EDU)
4. Statistics (STAT)

AMM 2021 is one of the most popular national conferences in Mathematics in Thailand. There were 75 contributed talks and 30 proceedings papers with peer review. Over 300 mathematicians participated in the conference. Outstanding research papers are selected to publish in this special issue of the Thai Journal of Mathematics.

Editor-in-Chef
Suthep Suantai, Chiang Mai University, Thailand
Associate Editor-in-Cheif: Special Issue AMM 2021
Praiboon Pantaragphong, Puntani Pongsumpun, Thawatchai Khumrapussorn,
Kanognudge Wuttanachamsri, Phusanisa Lomthong and Nattaporn Chuenjarern,
King Mongkut's Institute of Technology Ladkrabang, Thailand

Contents

Hamming Distances of Constacyclic Codes of Length $6p^s$ over $\frac{\mathbb{F}_{p^m}[u]}{\langle u^2 \rangle}$	1
<i>Jirayu Phuto and Chakkrid Klin-eam</i>	
Semiabelian Hyperoperations with Applications to Menger Hyperalgebras	15
<i>Thodsaporn Kumduang, Khwancheewa Wattanatripop and Sorasak Leeratanavalee</i>	
A New Concept of Non-deterministic Hypersubstitutions for Algebraic Systems	25
<i>Sorasak Leeratanavalee and Sarawut Phuapong</i>	
Dictionary-based Model Order Reduction via POD-DEIM with Support Vector Machine for the Parametrized Burgers' Equation	38
<i>Norapon Sukuntee and Saifon Chaturantabut</i>	
Pancyclicity of Generalized Prisms over Specific Types of Skirted Graphs	53
<i>Artchariya Muaengwaeng, Ratinan Boonklurb and Sirirat Singhun</i>	
Closed Knight's Tours on $4 \times n$ Chessboards with Two Squares Removed	64
<i>Wasupol Srichote, Ratinan Boonklurb, Tanatorn Kaewwannarat and Sirirat Singhun</i>	
Some Properties of Tensor Products of Ternary Semimodules	82
<i>Thorrarin Pawaputanon Na Mahasarakham, Ruangvarin Intarawong Sararnrakskul and Nissara Sirasuntorn</i>	
Unshackle Game on 2D Grid and Shadow Strategy	89
<i>Thitiphut Leelathanakit, Ratinan Boonklurb and Sirirat Singhun</i>	
On the Ulam Stability of Two Fuzzy Number-valued Functional Equations Via the Metric Defined on a Fuzzy Number Space	103
<i>Jiraporn Kunrattanaworawong and Wutiphol Sintunavarat</i>	
Approximation of Common Fixed Points of Suzuki-Square-α-Nonexpansive Mappings in CAT(0) Spaces	113
<i>Thanatporn Bantaojai, Cholatis Suanoom and Chatsuda Chanmanee</i>	
A Short Proof of the Generalized Caristi-Kirk Fixed Point Theorem Using Theory on Ball Spaces	124
<i>Woraphak Nithiarayaphaks and Wutiphol Sintunavarat</i>	
Image Reconstruction by Least-Squares Method using Adaptive Basis with Similarity Metric	130
<i>Siriwan Intawichai and Saifon Chaturantabut</i>	

Modified Dai-Yuan Conjugate Gradient Method with Sufficient Descent Property for Nonlinear Equations	145
<i>Abhiwat Kambheera, Abdulkarim Hassan Ibrahim, Abubakar Bakoji Muhammad, Auwal Bala Abubakar and Basim A. Hassan</i>
